

Dear Ribbond User,

Since I introduced Original Ribbond® bondable reinforcement in 1991 and Ribbond THM in 2001, Ribbond products have become the standard for fiber dental reinforcement. With the introduction of Ribbond ULTRA in 2013, the standard has become even higher!

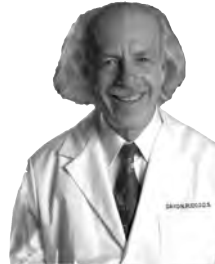

Ribbond ULTRA is our premium dental reinforcement. It's thinner, stronger and adapts even easier than Ribbond THM.

Try Ribbond ULTRA yourself and see how even the best can get better!

Best wishes,

David N. Rudo, DDS  
Developer and President,  
Ribbond, Inc.

Made with even thinner fibers, **Ribbond ULTRA** offers the same crack stopping leno weave and high-strength fiber technology as other Ribbond products, but with greater ease of use and more comfortable results!

THM  
**Ribbond-Ultra**  
(Ultra Thin - Higher Modulus)  
**Bondable Reinforcement Ribbon**

- ★ **Thinner**  
30% thinner than Ribbond THM
- ★ **Stronger**  
Greater peak load. 20% greater flexural strength
- ★ **More Adaptable**  
Lays flatter against the tooth substrate
- ★ **Thinner Bond Line**  
Creates stronger bond to the tooth
